8:00 am EST/6:00 PM Pakistan time

Webinar on 'Implementation Science and Higher Education in LMIC'

Implementation science in the context of higher education is primarily concerned with the study of the methods aims at promoting the application of research outcomes into classroom practice and educational policy. Implementation science in higher education can be instrumental in improving classroom functioning and student outcomes by focusing on strategies that increases effectiveness of various programs. The webinar will empower the audience about implementing effective pedagogy and learning strategies in higher education through addressing the research-practice gap specifically in the context of developing countries.
